Did you know?

Frozen Holds

The MARINet catalog allows you to “freeze” your holds! This feature allows you to temporarily suspend a hold for when you want a popular book at a certain time.

Here are the quick facts:

- Your frozen hold will continue to move up in the hold queue.
- If your hold reaches the top of the hold queue, and is ready to be filled, the system will go around your hold and fill the next ones, until you un-freeze your hold.
- If all holds except yours have been filled, and a copy of the item is available, the system still won't fill your hold until you un-freeze that hold.
- You cannot freeze a hold for an item if there is an available copy. There must be a hold queue on the item for you to freeze your hold.

For more information, please visit the [Frozen Holds](#) webpage of the MARINet Catalog.

Internet Access

We have two 1-hour computers and two 15-minute computers for the community to access the internet. A little known fact about our 1-hour computers is you can make a reservation in advance! Call us at 415-258-4656 to reserve your preferred hour. Patrons must have a library card in good standing to use the 1-hour computers.

Our two 15-minute internet computers are designed for express use and are available on a first-come, first-serve basis. If both computers are in use, ask the Reference Librarian when they will be available next. If no one is waiting for these computers, patrons may continue to use them for an additional 15 minutes.

We also have Wi-Fi! Our Wi-Fi connection is “midas” and there is no password.

J.M.W. Turner: Painting Set Free

Tuesday, July 14

12pm, Town Council Chambers

Joseph Mallord William Turner (1775-1851) was one of the greatest British artists of the nineteenth century. *J.M.W. Turner: Painting Set Free* is the first major exhibition devoted to Turner's achievements during his final period of productivity, when his work articulated a radical vision that was heedless of public reaction, and explored such themes as the rise and fall of civilizations, the natural and industrial worlds, and religious and cultural mythology.
